SUBJECT INDEX

In order to expedite the publication of this subject index, machine procedures have been employed that do not permit the formation, except rarely, of sub-subheading nor the alphabetization of subheadings beyond the first word.

- Ability** (See also the several abilities)
 assessment of human ability, 4053
 differentiation, in Indian boys, 4972
 & factor analysis, 82
 factor analysis of, Philippine college women, 7994
 & interests, correlation between, 9th-grade boys, 8279
 to learn & intelligence, 3873
 measures & factor analysis, 4048
 numerical order, nature of, 3132
 organization of, factor order in, 4924
 & paired-associate learning, in normal & retarded children, 7025
 text on measurement of abilities, 1189
 universal, logical basis for, rejection of, 4027
 & verbal learning, & anxiety & difficulty, 6111
- Ability/verbal, epilepsy & laterality of verbal intelligence in brain, 3548**
 factor analysis of scale of, 1246
 & nonverbal in brain-injured retarded children, 1691
 & visual recognition threshold, & word frequency, 7457
- Abnormal behavior** (See also Neurosis; Psychopathy; Psychosis)
 appraisal by urban leaders, 1550
 behavior, & EEG, 5307
 in crisis situation, preventive intervention, 5311
 ratio scale for, 3239
 tongue-thrusting, clinical hypothesis on, 5354
- Abnormal psychology** (See also Clinical Psychology; specific aspects of abnormal psychology)
 course in abnormal psychology, & student attitudes in mental illness, 4098
 & genetics, 680
 gynecomastia, & body image, in adolescents, 5536
- Absenteeism, & age, 3903**
 in factory, 3946
 industrial, factors in, 3943
 information transfer, 7627
 problem, 3945
 reliability of measures of, 2105
 from school, 1933
 from school, correlates of, 7141
 in schools, personality correlates of, 7145
- Absolute judgment, & anchoring effect, 226**
 of brightness, & response bias, 7440
 of distance & anxiety, 3283
 of length, 3291
 & remote handling, 3963
 & response mode, & training, 5979
 Thurstone's scale theory of, 4966
 of velocity, 2311
 of weight, 259, 7433
- Abstract, vs. document title in conveyed information, 1147**
 1963 requirement in manuscripts submitted to APA journals, 98
 vs. original material recall, 1154
 personnel research reports, Air Force, 7246, 7262, 7263
 of U.S. Army Med. Res. Lab. reports 400-540, 4058
- Abstraction** (See also Concept; Generalization; Thinking)
 & arithmetic achievement in retardates, 3570
 & brain injury, in children, 6998
 & conceptual errors, 5502
 measure of, 3125
 in monkeys, 2799
 & moral judgments, 2895
 orientation, in concept formation, vs. generalization, 6185
 of proverbs, by normals, 3708
 representation of, through line patterns, 6172
 & schizophrenia, 3691
 suggestibility & abstract conditioning, 384
- in training distorted stimuli recognition, 387
 of visual properties, analysis of, 488
 & word associations, 2843
- Academic achievement** (See Achievement/academic)
- Acceleration/body** (See Gravity)
- Accident** (See also Automobile; Driving; Safety)
 & attitudes, & psychology of safety, 7360
 auto, & suicide attempts, 3987
 human factor in, 8376
 Leary's Interpersonal Check List with industrial accident & nonaccident employees, 2168
 & life experience, & psychology of safety, 7363
 in motor vehicle, research on, 8373
 patterns in children, 2169
 prevention, & understanding of, & experimental psychology, 5851
 proneness & conflict-tension theory, 2166
 proneness, in various countries, data collection techniques, 7365
 psychological aspects of, review of, 7366
 psycho-social aspects of, 5847
 & safety in industry, 2030
 traffic, prediction of, scales for, 2170
 traffic, causes of, theoretical approach, 8374
 traffic, & ulcers, 8375
- Acclimatization** (See also Adaptation)
 to cold, & escape response, rat, 4551
 of hands to cold, of British fish filleters, 6043
 to heat & cold, & skin temperature, & rectal temperature, & oxygen consumption, 6298
- Acculturation** (See also Conformity; Culture)
 & adjustment of Jews, 1011
 of Dutch immigrants in Australian community, 1017
 in East Africa, & attitudes to authority, & political awareness, 4802
 in East Africa, & attitudes, to parents & education in, 4803
 in East Africa, discussion of, 4805
 in East Africa, & frustration, & aggression, 4804
 ethnic continuity in Israeli town, 1003, 1004
 of Puerto Rican children, & attitude, to Negro & white, 6535
- ACE Psychological Examination, & anxiety, 3888**
- Achievement** (See also next headings)
 changing patterns of, of U.S. Japanese, high school students, 7190
 under competition, & personality, 7197
 & mental health, 1555
 & motivation in children, 4690
 motivation & muscle tonus, 1311
 pressure & college grades, 5662
 of retardates, 5425
 social class, & deferred gratification, 1014
 socioeconomic & educational factors in, 3952
 striving for, & expectation, dissonance & valence of goal, 1936
 & work values, 3949
- Achievement/academic** (See also School achievement)
- & academic self-concept, 7199
 & achievement need, & affiliation need, 7194
 & anxiety, 3867
 & aspiration level, 2014, 7143
 correlates of, among Mexican-Americans, 2009
 & creativity, & intelligence in children, 2013
 Educ. Rec. Bull., test results, 5663
 & final exam in applied psychology in France, 1965
 & group counseling, 1985
- & intelligence, & extraversion, & neurosis, 3123, 3131
 interfering factors, with children, 1869
 & learning number system, 868
 in mathematics, 5666
 & neuroticism, & extraversion, 8275
 prediction of, & intelligence, 5675
 prediction of, personality variables in, 3874
 prediction of, & adjustment, of college freshmen, 8281
 & reorganization of schools, 3792
 & religious participation, 6575
 & school size, 2015
 & self-concept, 2008
 & socioeconomic status, 2007, 4715
 & sociometric ratings, 3887
 & student counseling, 1983
- Achievement/college, & anxiety, 3888**
 chances for, graphic presentation method, 3861
 & counseling, 7164
 & Edwards Personal Preference Schedule, 5661
 & entrance exams, 3865
 of fraternity, vs. independents, 5658
 in French, factors involved, 2003
 freshmen, & WAIS, 1998
 & high school courses, 2006
 of New Mexico high school students, follow-up study, 8273
 & parent's attitudes, 8284
 & perception of parents, 2920
 & personality differences, 5606
 & placement test scores, & high school achievement, 7203
 prediction of, 7205
 prediction of, by individual high school, 7189
 prediction of, New Mexico, 8276
 in psychology course & attendance, & time structure, 5962
 of public vs. private school students, 8282
 in South Africa, 2017
 stimulation of, 1961
 & student needs, 7193
 & vocational counseling, 3862
- Achievement need** (See also Aspiration level; Expectation)
 & academic success, 7194
 in adolescence, over achievers vs. under achievers, experimental arousal of, 4764
 & arousal, 5594
 & conformity in Indian students, 1021
 correlates of, in children, 6465
 cross cultural differences, 4812
 & decision making & demand for certainty, 495
 & economic growth, of nations, 5069
 & expectation of success, in anagrams, 8028
 & intellectual performance in high school students, 5672
 & intelligence test performance, 1307
 & job satisfaction, 8347
 & learning, & selective recall, 6724
 & occupational mobility, 2045, 2100
 & occupational role attractiveness, 7903
 origins of, in childhood, 2885
 & problem solving persistence, 467
 & professional field, 113
 & religious background, 1324
 & risk preference in managers, 2133
 & socialization, & family structure, in Brazil, 4827
 & TAT, 3202
 & TAT, Persians vs. Americans, 6551
 in thematic apperception, determinants of, 1276
- Achievement/over & under, & n Achievement, in adolescence, 4764**
 & counseling, 5286
 counseling of, college, 7166
 & gifted children, 5646
 in gifted children, correlates of, 7159
 & group counseling, 1985

- & group counseling, of adolescents, & affect, 6931
 - group counseling with, 5638
 - & group therapy, 1430
 - in high school students, psychological correlates of, 7185
 - & learning methods, 1870
 - & MMPI, college, 7186
 - parent attitudes &, 4753
 - & perception, of authority & peer figure, 3272
 - & self-concept, 3844
 - & sex differences, 2016
 - Achievement/prediction of (See also Prediction)
 - arousal, psychiatrists' ratings of, 5149
 - in business administration, in college, tests of, 5656
 - California Psychological Inventory &, 3883
 - & California Psychological Inventory, in Army school, 5670
 - in college, 7202
 - of college freshmen, 3872
 - with college students, 5669
 - & criterion stimulation, 2011
 - DAT, vs. short battery, in high school, 5665
 - with deaf children, 6975, 8132
 - with deaf students by WAIS & WISC, 1609
 - deputy sheriffs, 2051
 - with engineers, & reference letters, 7257
 - in engineering training, 3879
 - for first grade, by Metropolitan Readiness tests, 7195
 - of grade point, stepwise multiple regression in, 3871
 - in grade school, by intelligence, & anxiety, 5664
 - in high school science, with creativity tests, 8223
 - from intelligence tests, of scholastic grades, 5675
 - in Navy aviation school, 8314
 - in nurses training, 3869
 - in school, primary, 7204
 - of school children, in Congo, 3875
 - in school work, & curiosity & interest, 5668
 - of third grade pupils, 3886
 - of undergraduates, superior, 2010
 - Achievement test (See Test/achievement)
 - Acquiescence (See also Social desirability)
 - & authoritarianism, & dependency, 1266
 - & personality items, 3143
 - as response set, & personality, 3150
 - as response set, & term characteristics, 6685
 - & social desirability, 5022
 - on SORT, & social desirability, of college students, on Gough Adjective Checklist, 8018
 - Action potential (See also Potential)
 - in cerebellum from cortex stimulation, 584
 - Activation, & behavior, book, 4290
 - biological modality of, & specificity of, 4478
 - cortical, & schizophrenia, process-reactive dimension, 7071
 - level of, & age & intelligence, in children, 827
 - level of, during serial learning, & retention, 6119
 - level during tracking with muscle tension, 337
 - in reticular formation, & cortex dominant focus, 2578
 - Activity, adaptation of blind cave fish, 2675
 - & age of rats, 2967
 - & deprivation, & age, in rat, 2706
 - & digestive system, 4527
 - diurnal, in rats, with visual-system lesions, 7641
 - & EEGs, 2585
 - of elderly, 971
 - of fish, & temperature, oxygen & light, 2671
 - & food deprivation in humans, 4289
 - & genotype of mice, 682
 - higher nervous, & irradiation, baboons, 4553
 - higher nervous, & school work, & games, 4702
 - higher nervous, & work processes, 5764
 - & hippocampal lesions, rat, 7648, 7652
 - in home cage, of rat, 2705
 - in home cage, & food deprivation, in rat, 7766
 - & hunger, in neonatal rat, 6326
 - & learning, 2431
 - & learning, in boys, hyper, vs. hypo, vs. normal, 6451
 - locomotor, under mescaline, rat, 636
 - locomotor, & frontal lesions, Rhesus, 7646
 - manipulatory, & food deprivation, in cat, 4592
 - measure of, & deprivation weight loss, in rat, 4594
 - measurement of, nutating annular cage for, 7768
 - mental, concrete & abstract, review, 1894
 - motor, & organismic tension, 6071
 - & nociceptive stimuli, 625
 - in open field, of adrenalectomized rats, 7684
 - operant level, with limited vs. continuous access, rat, 721
 - & patient welfare, 3421
 - & radiation, 4552
 - rhythmic activity in animals, 6312
 - & sensory stimulation of cats, 717
 - strain differences in, rats, 7103
 - suppressed, by saline injection, in mice, 7700
 - volitional, & physiological mechanisms, 389
 - & weight loss, in rats, 7773
 - Acuity (See also Visual acuity)
 - auditory, & speech perception, 4264
 - stereoscopic & observation distance, 7486
 - Adaptation (See also Acclimatization)
 - in eyes of cephalopods, 2600
 - to cold, of fishermen, 6300
 - & mental hygiene, 3472
 - olfactory, in neonate, 6419

- & escape performance, in rat, 4635
- & food deprivation, & goal box cues, with rat, 6394
- in human learning, 4389
- number of trials of, & extinction resistance, in rat, 4658
- & partial reinforcement, 2767, 2787
- & pretraining, 2728
- & retention, of meaningless material, with children, 7608
- & retention, in children, 2851
- secondary, in rat, 6398
- Reinforcement/intermittent, by conditioned aversion, 747
- & conflict, & observing response, 7604
- & learning set, in Rhesus, 7849
- & programmed instruction, 5578
- schedule of, & precisely timed response, rat, 760
- Reinforcement/light, & diurnal cycle, with rat, 6379
- & light deprivation, in monkey, 7774
- long-term development of, 7836
- & optimal stimulation level, 2788
- self-regulation of, & rearing & test luminance, in rat, 7755
- Reinforcement/negative (See also Punishment) & autokinetic effect, 2280
- of bar pressing & preshocks in mice, 748
- effect on absolute judgment, 7627
- generalization under, vs. food, monkeys, 744
- & positive & heart rate, 669
- vs. reward, verbal vs. nonverbal, with schizophrenics, 1795
- in schizophrenia, with paired-associate learning, 3701
- shock intensity, & trial distribution, rat, 7831
- verbal censure, & problem solving, schizophrenics vs. normals, 3697
- in verbal conditioning, & experimenter's attractiveness, 2451
- Reinforcement/partial, alternating, pattern running in, & intertrial interval, rat, 7828
- & amount of reinforcement, 771
- of bar presses, 774
- & continuous reinforcement, before extinction, 6397
- & delayed, answer to criticisms, 432
- & delayed reinforcement, 2767, 2787
- differential pay-off probabilities, discrimination of, 762
- discrimination learning & extinction resistance, rats, 7818
- in discrimination reversal, with 24 hr. intertrial interval, 6401
- & discrimination reversal, in rat, 2790
- effect sustained, through continuous re blocks, 4661
- & extinction resistance, 425
- & extinction resistance, in lever pulling, 413
- & extinction, rats, 7837
- & extinction resistance, & acquisition level, rat in runway, 7833
- in eyelid conditioning, & UCS omission vs. delay, 7571
- with goldfish, 4614
- & intertrial reinforcement, in rat, 6381
- & nonreinforcement, & frustration effects, rat, 7838
- & observing response, 2796
- probability learning & drive level, & age, & training procedure, 4660
- probability of, & speed requirements, in motor performance task, 6134
- & response dimensions, 6391
- & resistance to extinction, 7602
- reward discrimination in, vs. continuous, 4649
- & reward magnitude, & extinction, 4662
- role of, & identity definition, 5483
- & running response, 6392
- & running speed, rats, 7837
- single alternation of, vs. random, with spaced trials, rat, 7829
- & sodium amylal, with rat, 7717
- & transfer in runway, 764
- in turtle, 769
- & UR sequences, & discrimination reversal, 6402
- & verbal conditioning, 2441
- Reinforcement schedule, adjusting, in shock avoidance, 755
- & bar pressing, 6400
- competitive VI, with rats, 7830
- continuous, vs. irregular, vs. single alternation, & extinction resistance, 4641
- & discrimination reversal, rat, 779
- in escape behavior, in rat, 2764
- & extinction, & chance vs. skill instructions, nonverbal measure, 4391
- extinction, & in fish, 4646
- & extinction resistance, & children's age, 4703
- & extinction, of bar pressing, in children, 864
- & eyelid conditioning, 7574
- FI in chain schedule, 2772
- fixed interval, with variable interval concurrent, 765
- fixed-interval, chaining in, stimulus functions in, 775
- fixed-interval, visual clocks in, 784
- fixed ratio & counting schedules, 2774
- fixed ratio, with pre-time-out stimulus, & drug effects, 641
- fixed ratio, & force of response, 4654
- & generalization, of meaning & awareness, 2489
- in human learning, 4395
- interlocking, with rats, 761
- & intertrial in T maze, 787
- math analysis of, 2493
- mean interval length, in operant discrimination, in rat, 2746
- multiple, chlorpromazine effects in dogs, 665
- & operant extinction in rats, 772
- in paired-associate learning, 441
- & precisely timed response, rat, 760
- ratio schedule & reward strength, 770
- regular following partial, & extinction resistance, in pigeon, 6388
- with retarded children, 3562
- amount reward, correlated with inter-response time, in rat, 4647
- & rigidity, in normals & mentally retarded, 1699
- & response latency, 2785
- & response rate, 2779
- & response speed, in preschool children, 6447
- & response variability, in children, 2860
- & saccharin concentration shift, & licking response, in rat, 6387
- & secondary re strength, in rat, 4640
- S_a effects on FI, 2769
- & timing behavior, human, 2457
- in 2-choice learning, 2771
- variable interval, food reinforcement, & drinking behavior, 766
- in verbal conditioning, 421
- in verbal conditioning & extinction method, 4340
- in verbal operant conditioning, 4393
- Reinforcement/secondary, by conditioned aversion, 747, 2752
- & conditioning association, extinction percentages, 7867
- & cue strength of stimulus, 742
- delayed, in rat, 6398
- in discrimination problem, 418
- & dissonance, 410
- in extinction, with children, 6445
- information hypothesis of, experimental study of, 6384
- & learning set, in Rhesus, 7849
- in operant conditioning, of retardates, 5403
- power of, & poststimulus conditions, 2776
- & primary re schedule, in rat, 4640
- sensory stimulation & neutral cues & 2765
- by shock termination, association with, in rat, 2757
- & stimulus types, with children, 7867
- & stimulus reliability, & information value, with rat, 4644
- Reinforcement/verbal, of affective responses, 7565
- affirmation, vs. interpretation, with schizophrenics, 5478
- aggressive content of, & play behavior, preschool, 4736
- with children, 2866
- of dependency, & aggression, 4976
- of emotionally disturbed, 7600
- with emotionally disturbed boys, 4737
- incentive values in, in paired-associate learning, 6600
- & intelligence, 4763
- vs. nonverbal, with schizophrenics, 1795
- with normal & retardates, 1709
- in operant conditioning, 7600
- & perception of illusion, 5991
- praise & creativity, 6703
- & psychotherapy, of feelings vs. content, 5162
- right vs. wrong, & response alternatives, 6128
- "right" & "wrong" with students & patients, 420
- with schizophrenics, 1798, 1809
- in serial verbal learning, & sex of S & E, 7598
- & skin conductance level, 411
- of social desirability, in self-description, 3178
- S-S learning, 2463
- for stutterers, 6985
- of TAT theme, 2455
- variables in, 2474
- of verbal behavior, in interview, 4350
- in verbal conditioning, 2442
- vicarious vs. direct, 7599
- vicarious, & group size, in verbal learning, 7591
- & vocational interest, 3846
- of word associations & word meaning, 2492
- Reliability, of absence measures, 2105
- of Allport-Vernon Study of Values, 4947
- of Blacky Pictures test, 3185
- coefficients, K.R. 21 as, & alternatives, 4044
- in decision making, 2532
- of developmental information, 2850
- formulas & intraclass correlation, 2234
- generalized KR 21, lower bound for, 81
- Guilford-Zimmerman Temperament Survey, 1257
- of handwriting quality, 5649
- of human operator in automated systems, 2083
- of interest tests, 5653
- internal consistency formulas, with randomly sampled single-factor tests, 5923
- of IPAT Anxiety Scale, 3276
- & item difficulty, 4936
- in judging musical performance, 3073
- of Kramer Intelligence Test, 3112
- Kuder-Richardson formula vs. equivalence, 69
- Madras Picture-Frustration Test, 1199
- of MMPI auditory-malingers' scale, 3110
- of multiple-choice test, 4938
- of oral exams, 5645
- of personality assessment with juvenile delinquents, 1743
- of psychodiagnostic tests, 6751
- of ratings, 5705
- of sentence-completion scoring, 3155
- of skeletal age, judged from hand films, 1600
- of Social Behavior Chart, 5112
- of suggestibility measure, 5244
- Religion (See also Cultures)
- & Achievement, 1324
- & anxiety, 1332
- attitudes to, 1186, 3009
- attitudes of, sex differences in, 1062
- beliefs & social pressure, 4846
- Bhagavad-Gita & mental health, 4927
- Buddha, a schizophrenic?, 5100
- & childhood experiences, 1040
- church congregation, communication with, 3063
- & civic sense, of French youth near end of 4th Republic, 7894
- college students' attitudes to, 1942
- concept of surrender, in India, 4023
- differences in, in island population, & genetic heritage, 6548
- dissonance in, & emotional disturbance, 6476
- education in, research plans for, 5550
- education in, growth of, 5553
- & ethnic distance, & education, 6584
- & ethnic prejudice & authoritarianism, 7936
- & evil, 36
- Freud's views on, 1355
- & group discussion, 2977
- Indian values in, 4826
- Indian students' attitudes toward, 3820
- inhibition, & cognition, 7866
- industrialization of, dilemmas in, 6559
- knowledge of, & participation in, & scholastic aptitude, 6575
- language of, vs. scientific logic, 6633
- life in, & perceptual processes, 3091
- man's search for meaning, 1446
- & meaning, 33
- & mental health, 6948

SUBJECT INDEX

**Religion
Respiration**

- & mental illness, 6960
- ministers' attitudes, to juvenile delinquency, 3628
- & morality, & behavior, of college students, 3015
- mythology, 8042
- new golden bough, 5946
- pastor, clinical training for, 4102
- & personality dynamics, 5064
- & personality development, 7883
- & psychiatry, 7386
- & psychoanalysis, 6807
- & psychoanalytic theory, 6592
- psychological study of, methods in, 5903
- Protestant subgroup, status of, & mental disorders, 7107
- questions in, psychological investigation of, 2246
- & rehabilitation, 8127
- religious psychology of Jung, 2190
- religious psychology, 2212
- religious belief, 3005
- rural church affiliation, & social-issue attitudes, 7932
- & self, & mystic experience, 5901
- of significance to clinician, 5290
- snake-handling cult, psychology of, 4791
- & social mobility, 6554
- & society, 3002
- sociology of, & image of man, 6519
- & personality, 4855
- transmission in pastoral relations, 3444
- as vocation, 5700
- voting in metropolitan area, 1054
- & worldly success, 1309
- Zen Buddhism, & psychology, 5886
- Reminiscence, age differences in, mental & chronological, 4781
- & amount of pretest practice, 355
- & drive, 2401
- in learning softball, & nonpractice interval, 4328, 4329
- in motor learning, 2434
- of paired-associates, & arousal level, 7588
- in parametric Auerle, 4613
- in perceptual-motor task, 2402
- & personality, & drive, 3250
- & rotating spiral, massed & distributed practice, 4164
- in schizophrenia, & stage of illness, 8191
- on symbol substitution, & drive level, 7554
- Remote, handling & weightlessness, 3963
- Report, absolute judgment of velocity, 2311
- absolute weight judgments, 259
- aerospace work-rest schedules, 5757
- aircraft rebreather oxygen system, 3930
- Air Force officer jobs, predicting success in, 8313
- Air Force aptitude, & high school achievement, factor analysis of grades, 8278
- analgesic agent, & muscular work decrement, 2627
- anxiety & "certainty," 5086
- anxiety indices in human figure drawings, 4989
- on APA committee of national & international affairs, 138
- apparatus for game theory research, 514
- armor skills, at night, practice in, 8321
- Army aerial surveillance, image systems of, 7341
- Army Classification Battery revisions, 5693
- Army disciplinary problems, prediction of, 7308
- Army disciplinary record, correlates of, 7309
- on Army monitor jobs, & vigilance in, 7336
- arousal & stress susceptibility, 2656
- audiometric comparisons, 5342
- auditory signal detection, 2374
- autokinetic effect & deafness, 2283
- avoidance learning & oxygen supply, 4548
- avoidance conditioning, & skin temperature, monkey, 7821
- backward masking, 4240
- car operation, 5338
- classification of headaches, 1641
- coding in digital circuits, 3972
- comparing multinomial probabilities, 5926
- compensatory tracking apparatus, 5822
- compensatory tracking, 5776
- on conference on unemployed, out-of-school youth, 6509
- consonant intelligibility, 2381, 2382
- control & display designs, 2143
- cutaneous sensitivity, 8365
- development of training equipment, 5743
- directionality in drawing a person, 4978
- drug addiction, 8170
- ego strength & psychotherapeutic outcome, 5147
- evaluation of aerial displays, 3973
- factor analysis of neuropsychiatric chronicity scale, 5033
- factor analytic hostility scales, 5052
- follow-up conference on unemployed, out-of-school youth, 6508
- function of cochlear hairs, 4505
- generalization of S-R pairing, 2448
- generalization gradients, 7579
- group psychotherapy, 1436
- head tilt & eye counterrolling, 7502
- hearing protective devices, evaluation of, for soldiers, 8336
- hearing of pilots, 8306
- human performance under rotation, 4277
- human proficiency in weapon systems testing, 5723
- human-guided missiles, by remote control, training in, 8323
- HumRRO 1963 work program, 7218
- incentive & running speed, rats, 7844
- inference behavior, 4143
- image interpretation of target photos, 5834
- on International Congress of Applied Psychology, 145
- international language for aviation, 3970
- of interviews with business executives, 2123
- job analysis bibliography, 5766
- job performance aids, 2075, 2076
- luminosity generalization gradients in pigeons, 2718
- maintenance, 5820
- mechanical impedance of human body, 5771
- MMPI's vs. sociometric data vs. self-rating, 4982
- mortality from explosive decompression, 4549
- motion sickness & spatial perception, 5781
- Navy electronic technicians, math proficiency of, 8320
- negatively correlated reward & running speed, 2777
- nystagmus & disorientation in humans, 3933
- oxygen-nitrogen & psychomotor performance, 5772
- parental attitudes & child behavior, 4756
- perception of postural verticality, 4167
- performance aids in man-machine systems, 5761
- performance in space, 3968
- personality trait criteria, 3184
- personality trait & peer nomination scores, 3166
- personality correlates of sensory deprivation, 4274
- personality correlates of admitted criminality, of college students, 5459
- physiological correlates of MMPI scores, 5533
- practice & simplification, 4397
- pretraining & delay of reinforcement, 2728
- procedural guide to programmed instruction, 5582
- prolonged space flight, & weightlessness, 7720
- propellant-atmosphere system, 5783
- proton radiations in space, 2654
- psychiatric nursing, 8113
- questionnaire-technique experimentation, 3942
- & radiation, 7720
- reactions to infantry training, 5746
- recruiting strategy, of military, 8307
- remote handling in advanced systems, 2159
- replication of anxiety on eyelid conditioning, 373
- selection of officers, 2055
- semicircular canals, nystagmus, 4278
- sensory deprivation, 4275
- signal detection, 5976
- simulated B-52 training, 5749
- simulated space flight, chimp performance during, 7719
- size & distance perception, 7477
- solar flare radiation, 2655
- of Soviet reactions to U. S. Moscow's exhibit, 1088
- spacecrew training, 5744
- spectral estimation & operator characteristics, 5765
- speech intelligibility index, 3965
- speech discrimination, prediction of, 7520
- stability of Air Force Classification Tests, 5716
- stability of Rorschach scores, 5024
- stimulus generalization & aggression, 2459
- supplementary on T maze alternation, 796
- supplementary on partial & amount of reinforcement, 771
- supplementary on shock intensity & unconditioned responding, 758
- supplementary on choice behavior & alternative events, 501
- supplementary on instructions in target perception, 474
- supplementary on unlearning gambler's fallacy, 426
- supplementary on retention & storage load, 444
- supplementary on item repetition in paired-associate learning, 409
- teaching machines, 5577
- threshold shift & ear protective devices, 3964
- training raters, 4992
- vestibular nystagmus, & arousal, 7496
- on vibration & psychomotor performance, 3935
- visual monitoring, 3977
- visual targets in parabolic flight, 4833, 7352
- WAIS & Shipley-Hartford Test, 5001
- weightlessness, 3774
- weightlessness & remote handling, 3963
- weightlessness & positioning responses, 5777
- work & treadmill performance decrement, 3927
- Work Evaluation Report, with retardates, 7002
- work-rest schedule & performance, 2087
- youth attitudes to Peace Corps & education, 5617
- Repression (See also Defense mechanism) & forgetting, 1341
- Freud's concept of, 3314
- & guilt, & aggression, 8026
- in hypnotic amnesia, 1449
- of impulse, & adjustment, 1301
- inference of, from psychological tests, 3237
- & MMPI, uses for, 1288
- neurobiological findings on, 5094
- & perceptual defense, 1339
- & sensitization, scale for, normative data, on, 3290
- Research (See also Experimentation; Research methods; Survey research)
- approaches in communication, 1128
- basic & applied, 2183
- & behavior control, 116
- in community participation, Springdale project, 996
- computer applications to, symposium on, 2269
- in education, 1859, 3786, 3789, 3791, 8219, 8220
- industrial, & development, bridges between, 5819
- in industry, productivity in, & life history, 6705
- negative findings, publication of, 7370
- parsimony in, 7381
- problems in, histories of, 4005
- qualities of mind necessary for, 117
- reflexivity in, 4019
- in religious & character education, plans for, 5550
- shotgun or saltshaker approach, 21
- with single subject, 1478
- in social work, 1516
- subjects for, obtaining of, 4088
- on war & peace, needed, 4790
- Research methods, with aging populations, placebo effect, 959
- dimensional analysis, 7349
- on driving accidents, 8373
- evaluation of doll play, 843, 1388
- introduction to, textbook, 51, 7377
- longitudinal study, problems of, 4677
- network approach in management research planning, 1
- in psychiatry, 1376
- in psychiatry, symposium on, 8048
- teaching of, to gifted children, 1880
- Reserpine, & conditioned emotional response, 2646
- & conditioned fear, 7716
- & conditioned reflex, in goat, 7716
- & growth, mice, 639
- & reinforcement & heart rate, 669
- Respiration, & classical conditioning, 4638
- conditioned reflexes, 4700
- conditioned in cats, 4460
- & conditioning of extrasystoles, 4352
- of elderly, 2949
- of patient & therapist, 5140
- pneumographic recordings during rest, work, fatigue, pain & pressure, 2082
- & sleep deprivation & chlorpromazine, 655

Response (See also next heading; Delayed response; Set/response)
bar pressing response force & reinforcement requirements, 780
bias, with check lists, & forced choice, 6727
competition & drive in rats, 789
& conflict, 7604
consummatory & runway performance, 767
dimensions of, under ratio reinforcement, 6391
dominance & drive level, 469
drive & competing hierarchies of, 349
equivalence, in verbal learning, 2485
equivalence, & mediated generalization, 357
exteroceptive cueing of bar pressing response force, 780
factors in perceptual defense, 177
familiarity of, & recognition threshold, 7456
fixation, vs. stimulus, rat, 754
force during ratio reinforcement, 4654
& intermittent reinforcement, 7604
mediation in tracking, 330
mode, in programmed learning, 1895
mode, & difficulty, in programmed learning, 1872
observing, in pigeon, 776
observing, acquisition of, 7604
observing response & food deprivation, 2796
observing, & conflict theory, 7771
overt vs. covert responding with programmed instruction, 1899
preferences, of Indian vs. U.S. students, 6550
pretraining in association learning, 361
probability, & nonreinforcement variables, rat, 781
rate of, & hunger & reinforcement frequency, 2779
rate of, as preference measure, in central stimulation, 2560
rate, computation of, from cumulative record, 7407
sequences with noncontingent reinforcement, 4396
set, in old age, 2945
set, & personality questionnaires, & authoritarianism, 1252
shift, learning set for, in Rhesus, 7850
similarity, & retroactive inhibition, 6153
similarity in paired-associate learning, 406
speed & reinforcement schedule, in pre-school children, 6447
strength, vs. all-or-none, 513
strength & drive level, 2789
strength, & drive level, & incentive magnitude, 4645
style factor in personality inventories, 1261
style & personality traits, 6720
style, on Rorschach, of nuns vs. college females, 8005
styles, in clinical & nonclinical groups, 5020
suppression of, in perceptual defense, 5089
type of, & stimulus generalization, 4318
unconditioned, & incentive motivation, 6406
unconditioned & shock intensity, 758
variability, & reinforcement schedule, in children, 2860
vigor, & reward magnitude, 6396
Response latency, & amount reinforcement, 2781, 2784
drug effects on, 4544
experimental differences in, & stimulus generalization, 4359
& preparatory set, 345
in programmed learning, & error rate, 6132
& reinforcement schedule, 2785
short selective reinforcement of, with rat in lever box, 6382
in 2 choice behavior, random walk model for, 7632
voluntary, to auditory signal, 6644
Resting, periods & productivity, 3937
schedule in space flight, 5757
working schedule & performance, 2087
Restrained, limited confinement, methodological study, 315
Retardate (See Mental retardation)
Retention (See also Forgetting; Learning; Memory; Recall; Recognition; Reminiscence)
classroom variables in, 3797
cognitive variables in, 2814
of conceptual material, & instructional set, 7597
& contextual constraint, short term, 7613

of controversial material, cognitive vs. affective factors, 7609
& cortical lesions in cats, 553
with delay recall & increased word load, 449
of discrimination, & prior & interpolated learning, pigeon, 7816
& immediate memory, 2501
of individual items, 448
& interpolated learning, duration of, 4411
in meaningful verbal learning, 391
methodological problems in, 453
in monkeys with epileptogenic lesions, 551
of motor skills, knowledge of results, 6077
of motor skills, & knowledge of results, & amount training, 6080
of nonsense syllables, & activation level, & auditory stimulation, 6119
of original material vs. precis, 1154
of paired-associate pair, & time between presentations, 6117
in paired-associate learning, 441
of paired-associates, 2482
of paired-associates in normals & retardates, 1682
of paired-associates, & pair meaningfulness, 7589
in paramecium aurelia, 4613
of perceptual-motor skill, & relearning of, 4327
of procedural skill, & rehearsal technique, 8329
& programmed instruction, 1899
& reinforcement delay, in children, 2851
of schizophrenics & drug effects, 1394
in school learning, 3800
short-term & remembering load, 444
of single paired associates, short term, 7614
& transfer, & intelligence, children, 4704
of verbal learning, & anxiety, 455
verbalization effects on, 860
& visual demonstrations, 5747
of visual designs & mental deficiency, 1680
of word chains, factors in, 6650
of written sentences, order of presentation, 4408
Reticular formation, acoustic, & somatic responses, in cat, 580
activation in, & cerebral dominant focus, 2578
& analyzer, 6202
& cholinergic systems, 2540
cooling of, & cortical activity, cat, 593
electrical activity of, & adrenaline, & acetylcholine, & procaine, 4447
electrical activity of & conditioned reflex formation & extinction rabbit, 4499

SUBJECT INDEX

Skin
Social desirability

Skin (See also Cold; Cutaneous sensitivity; Pain; Touch; Warmth)
adaptation of thermal pain in, 6037
basal resistance during, sleep & dreaming, 1468
cholinesterase & nerve endings in, & sensation impairment, 7669
communication through, "vibrates," 4214
cortex ablations of, & instrumental conditioning, dogs, 6361
cutaneous sensibility, 4222
detection of stimuli & vigilance, 2427
disorders of, & Maudsley Personality Inventory, 5530
disorders of, & autonomic functions, 5541
electrical activity of, stability & adaptation, children, 6270
electrical sensitivity of, & phosphene thresholds, 6262
electric stimulation of, & evoked potential, rabbit, 6256
heat sensations in, & analogous other sensations, 6046
neurodermatitis, & MMPI profile, 5525
nonsweating & electrolyte conductance, 6199
palmar sweating, & resistance & potential, 4435
potential & epidermal δ -waves, 615
resistance, & potential, partial puncture effects on, 630
resistance, recording of, in unrestrained rat, 6328
senses, magnitude judgments in, 4217
sensitivity in light & darkness, 4218
sweating & blood flow in, method for recording, 7637
temperature & avoidance behavior, monkey, 7821
temperature, & threshold for electrical current, 6266
temperature, & acclimatization to heat & cold, 6298
temperature, noxious threshold, of cats, 6338
vasomotor control, 7691
vibration threshold of, parameters of, 4221
vibrations & pitch, 2357
vibratory stimulation of, reaction time to, 7355
Sleep (See also Dreaming; Narcosis; Sleep deprivation)
& barbiturates, in melancholia, 6824
basal skin resistance during, 1468
& conditioned respiratory reflexes, 4700
disturbance in, emotional factors in, 3271
& EEG's of cat, 573
EEG during, in rat, "activated," 4496
& EEG, narcolepsy, hypersomnia, 6250
EEG spindles during, 5402
EEG study of, in kitten, 569
essay on, 5972
& hypnosis, 5247
hypothalamic temperature during, 7680
induction in cat, EEG & EMG, 6248
of infants, 6485
issue, attitude to, & rural church affiliation, 7932
learning during, in brain-injured boy, 6997
nervous mechanisms underlying, cat, 4494
orienting reflex in, selective extinction of, 2590
paradoxical, & midbrain stimulation, in rabbit, 571
physiology & psychology of, 323
somniaambulism & learning theory, 3380
speech perception during, training for, 2437
stages of, & evoked response, to clicks, 6257
& stimulation, 92
thresholds & depression, 3724
Sleep deprivation, & age of rats, 2715
in deer mice, technique for, 6330
& dreaming, 2397, 6876
& EEG, finger plethysmogram & respiration, 655
EEG's during, 4493
hallucinations in, 324, 325
mental work under, muscle tension during, 6061
& noise, 4286
physiology & psychology, 323
in rats, 2966
& reaction time, 578
& schizophrenia, 5469
